

BULK FUEL TANK KIT

Upgrade your storage tank filtration and help keep your equipment up and running.

\$467+gst

Contaminated diesel can cause equipment downtime and costly repairs. One of the most common sources for contaminant is the diesel storage tank. Donaldson's bulk fuel tank kit incorporates modern filtration and moisture removal technologies to help deliver cleaner fuel to your equipment.

Unlike dessicant and silica gel breathers Donaldson T.R.A.P. breather will start working as soon as it's installed and remove moisture down to 15% relative humidity and airborne contaminants down to 3 micron.

As well as being simple to maintain and service, the large spin-on filter will remove 99.5% of contaminants 10 micron or larger helping deliver cleaner fuel to your vehicles.

Donaldson's Bulk Fuel Tank Kit includes 1" BSP taper fittings to attach up to the most common tank and hose threads.

- ✓ Ideal for common rail applications
- ✓ Deliver cleaner fuel to your equipment
- ✓ Take advantage of the kit price savings
- ✓ Prevention is the best cure

Protect your fuel from moisture & harmful airborne contaminants!
